

Requirements for Air Crates

For any pet shipment going out of China by cargo, only the following crates are approved by the Chinese Quarantine Office:

- The crate must be made of sturdy plastic with a ventilated metal door (Wooden crate is also acceptable)
- The container must have enough space to turn around normally while standing, to stand and sit erect, and to lie in a natural position:
 - o The Kennel length is the distance from the root of tail to tip of nose plus half the elbow to ground measurement.
 - o The Kennel width is twice the width of the widest point of the dog.
 - o The Kennel height is higher than the distance from floor to the tip of ears
- The fasteners must be secure; steel nuts and bolts are required instead of plastic fasteners.
- The crate must have adequate ventilation in the sides.
- The lock on the door of the crate must be a spring lock mechanism that cannot be opened easily. The locking pins should be more than 5cm.
- Food and water bowls must be attached to the door of the crate.
- Only one pet can travel per crate

Container not suitable for traveling as cargo

- Wire tops can cause problem
- Wooden crate can't be used for outbound shipment departing from China.
- Flimsy construction
- Plastic door
- Inadequate latching systems
- Poor ventilation provisions
- Plastic dohickeys (fasteners)
